Why Big Solar Panel Prices Are Fluctuating

You know what's wild? The average price for commercial solar arrays dropped 12% in Q2 2024, yet some buyers are paying more than they did in 2023. What gives? Three words: tariffs, supply chain bottlenecks, and outdated installation models. Let's break this down.

In May 2024, the U.S. Commerce Department slapped new tariffs on Southeast Asian PV modules. While residential systems (
